

30 April 2020

### **Infection control protocols – Covid-19 update**

- a. Completion of an infection control, and transmittable infectious diseases training and certification.
- b. Sally Dufty to be responsible for cleaning all surfaces which have been in contact with the patient after each patient with a Hydrex anti viral solution spray. Such cleaning will include door handles, wipe down pillows and chair seat and toilet facilities if used.
- c. A record of cleaning to be maintained, and a deep clean after each clinic.
- d. Hand sanitiser and hand washing facilities are available to patients before and after treatment, paper towels will be provided for drying hands.
- e. No towels will be available but patients can bring their own.
- f. There will be adequate time in between patients, so there is no crossover of patients and the clinic can be cleaned in between.
- g. Sally Dufty will be wearing appropriate PPE, it is advised that you bring a mask, but will not have to wear it during treatment if face down on the bed.
